**Experience  
of Half a Century**

Customs and trade Ministry  
given by

**“Consumer  
Your satisfaction  
In Principle  
Company”**

Binboğa Bal, the cooperative  
brand, received the award!

**HONEY A FIRST IN TURKEY**

## **Experience of Half a Century**

Binboga Honey Cooperative  
was founded by a  
community of beekeeper  
families in 1973. Our  
beekeepers have made  
progress towards becoming  
a honey center with the  
awareness of cooperatives  
and the increasing number  
of members in our country.

1

# Our Story

Honey is a completely natural, healthy and nutritious miracle. Beekeeper families from Kozan have been bringing this miracle food together with Cilicia (Cukurova), Turkey and the world for centuries. The experience of beekeepers from Kozan with their knowledge based upon ages ago incorporated under an institutional roof and Kozan Honey Agricultural Sales Cooperative was established. (Numbered S.S.745).

The cooperative which is the symbol of the strength and the unity of feelings of Kozan's beekeeping families has been the reliable address of healthy and natural honey since its foundation in 1973. The cooperative didn't let the trust down and performed new grounds in the honey industry one after another. Integrated facilities were established...

Honey, for the first time, was delivered to consumers in glass jars. The first honey analysis laboratory of Turkey was established. And... the quality of this miracle food, the gift of nature, has been documented and controlled by ISO 9001:2015 (Quality Management System) and ISO 22000:2005 (Food Safety Management System) standards. The brand of Kozan Honey Agricultural Sales Cooperative with 1700 partners, BINBOGA HONEY, is named after the Binboga Mountains as well as its naturalness, and taste, is the story of the product full of proud.

Binboga Honey

# Our Understanding of Quality

Binboğa Bal is packaged with full security and high quality in modern facilities equipped with advanced technology. Our facility has been the oldest one in the area since 1973 in Kozan district with the capacity of 6000 tons/ packing capacity a year.

The superior quality and food safety understanding of Binboga Bal is based on its international product certificates. Binboga Bal has ISO 22000: 2005 (Food Safety Management System), ISO 9001: 2015 (Quality Management System) and Halal Food Compliance certificate.

# About The Honey

Anatolia has such a rich vegetation cover that the structure of each honey can differ. The color of honey with the flowers our bees roam; Its fluidity is related to early milking from the hive.

.....

# Our Quality Policy

The quality policy of our Kozan Honey Agricultural Sales Cooperative numbered (S.S.745) is based on customer satisfaction and progressive improvement and has been defined by the Cooperative Board of Directors as follows: Our Quality Policy is to keep customer satisfaction at the highest level, to carry out activities in accordance with the cooperative law and official regulations with the contribution of our employees and members, to contribute to the economy of our region in the sector in which we operate.

To ensure the happiness of our employees and members, To be a reliable organization at all times and to increase this capital continuously while being aware of the fact that this trust is a big capital, To prioritize the interests of our members, to encourage harmony, creativity and success with group work, To be a pioneer and determinant in the cooperative activity, It is our company's quality policies to determine continuous improvement as our basic philosophy, not content with preserving our current situation.

# Our Food Safety Policy

As Binboga Honey; we ensure that our personnel, who directly affect food safety, are constantly informed and developed through training.

We work without compromising our quality by producing in accordance with the objectives of our cooperative, the Honey Communiqué and the Food Safety Management System under hygienic conditions. With all our employees, members and services, we prioritize human health and attach importance to adequate and balanced nutrition and ensure maximum customer satisfaction.

Our Food Safety Policy, to act with the principle of minimum risk and maximum hygiene, to ensure effective control and traceability in raw materials from input to shipment. To accelerate and activate communication networks related to food safety, to evaluate suppliers / members as internal customers and to control them on the spot, to prevent possible errors that may occur with the continuous supervision, training and participation of employees... To produce food in accordance with food regulations and other legal requirements is our food safety policy.
